SUMMARY

- Senior SDET & AI Automation Engineer with **5 years** of experience building high-performance test infrastructure and AI-driven developer tools.
- Specialized in the **Model Context Protocol (MCP)**, developing custom MCP servers and agents to bridge LLMs with local development environments and proprietary data sources.
- Expert in Python-based AI orchestration, building custom agents for Copilot CLI and Gemini CLI to automate complex engineering workflows and deep system log analysis.

TECHNICAL PROJECTS

AI Agent Ecosystem & MCP Servers

Jan 2026 – Present

- Engineered a custom **MCP Server** to expose localized system data and private documentation to LLMs, enabling context-aware code generation and automated debugging.
- Developed a suite of **Custom Agents** for Copilot CLI and Gemini CLI, automating repetitive CLI tasks and providing intelligent terminal-based reasoning for system configurations.
- Built **AI-native Skills** that integrate with agentic workflows to perform automated API contract testing and vulnerability scanning.

DevUtils & ARM (Automation Resource Management)

ChargePoint

- Architected an internal AI-integrated toolbox using **FastAPI** and **Streamlit** for deep log parsing and pattern recognition in complex Unix hardware-software logs.
- Implemented intelligent API simulations that reduced defect triage time by 30% by predicting potential failure points in EV charging logic.

EXPERIENCE

Senior Software QA Engineer

Apr 2025 – Present

ChargePoint, Gurugram, India

- Acted as the technical project lead for QA, shifting the team toward **AI-augmented testing** and automated infrastructure management for critical EV charging releases.
- Integrated LLM-based analysis into CI/CD pipelines to automatically categorize and prioritize test failures, achieving **40% faster regression cycles**.
- Engineered modular automation frameworks in Python and Pytest that utilize agentic reasoning to validate non-linear smart charging scenarios and load management.

Software QA Engineer

Apr 2022 – Apr 2025

ChargePoint, Gurugram, India

- Designed scalable test frameworks using Python and Playwright, **reducing manual test effort by 25%**.
- Leveraged cybersecurity knowledge to incorporate security-focused AI agents that monitor network traffic and API vulnerabilities using Wireshark and Burp Suite.

EDUCATION

PGP, Cyber Security

Jul 2023 – Mar 2024

Indian Institute of Technology, Roorkee

B.Tech, Electronics & Communications Engineering

2017 – 2021

Jaypee Institute of Information Technology

SKILLS

AI & LLM Infrastructure: Model Context Protocol (MCP), Custom Agents (Copilot/Gemini CLI), OpenAI API, LangChain

Frameworks & Languages: Python, Java, Pytest, Playwright, Selenium, FastAPI, Streamlit

DevOps & Infrastructure: Unix, Shell Scripting, Docker, Jenkins, Git, CI/CD Pipelines, Linux CLI

Databases & Security: RDBMS, Network Monitoring, Wireshark, Burp Suite, API Security Validation
